

# Singleton Pattern Example

## #Logger Class creation

```
public class Logger {  
    private static Logger instance;  
  
    private Logger() {  
        System.out.println("Logger is created");  
    }  
  
    public static Logger getInstance() {  
        if(instance == null) {  
            instance = new Logger();  
        }  
        return instance;  
    }  
  
    public void log(String message) {  
        System.out.println(message);  
    }  
}
```

## #SingletonTest

```
public class SingletonTest {  
  
    public static void main(String[] args) {  
  
        Logger logger1 = Logger.getInstance();
```

```
Logger logger2 = Logger.getInstance();
```

```
logger1.log("Singleton Pattern Example");
```

```
if(logger1 == logger2) {
```

```
    System.out.println("Only one object created");
```

```
}
```

```
}
```

```
}
```
